

Siege Media - FED project instructions

1. Build the mockup using HTML, CSS and Javascript. Use the images we provide for illustrations and icons. The mockup's filename is siege-statistics-mockup.png and is located in the image folder.
2. The project must be responsive / work on mobile devices (while keeping proper legibility).
3. Use actual copy and sources from [this document](#). Use the Google Font of your choice that would be close to the mockup.
4. Twitter and "copy to clipboard" functionality must work and allow you to either
 - a. Tweet the full statistic, followed by "via @siegemedia" (our [Twitter](#) handle)
 - b. Copy the full stat to clipboard, also followed by "via Siege Media" (plain text)
